PROFESSIONAL SUMMARY

First Class BSc (Hons) Computing graduate with a strong track record in stakeholder engagement, content creation, and cross-functional collaboration. Experienced in translating user insights into actionable strategies, managing communications across teams and partners, and executing initiatives with clear deliverables. Published technical author with a background in digital marketing and IoT product development. Interested in growth, engagement, and building practical, effective strategies.

PUBLICATION

STEAM STARTER: A Complete Guide to Arduino, ESP8266 and ESP32
Nepatronix Engineering Solution Pvt. Ltd · Published 2025

- Co-authored and edited a full-length IoT learning guide — managing content structure, voice, and delivery timeline
- Gathered informal user feedback from target learners to shape accessible, practical content that met real needs
- Coordinated with the Nepatronix team to align content goals, review cycles, and final publication standards

EXPERIENCE

R&D Associate *May 2025 – Present*
Nepatronix Engineering Solution Pvt. Ltd

- Engaged with stakeholders and users informally to gather feedback, shaping product iterations and documentation priorities
- Coordinated cross-functional efforts across engineering and content teams to deliver initiatives on time
- Managed and structured technical documentation, ensuring clarity and consistent communication across all audiences
- Contributed to planning and executing the STEAM STARTER publication — from content strategy to final delivery
- Built automation tools that streamlined repetitive workflows, improving team productivity and execution speed

Intern – Digital Marketing *June – Dec 2023*
Ad Media Pvt. Ltd

- Managed social media outreach and content creation for multiple campaigns, growing audience engagement through targeted messaging
- Conducted audience research and analyzed engagement data to refine content strategy and improve campaign outcomes
- Coordinated with creative and strategy teams across end-to-end campaign planning, execution, and performance review
- Translated complex concepts into clear, compelling content tailored to specific audience segments and platforms
- Contributed to stakeholder briefings and campaign presentations, communicating results and next steps clearly

part-time & remote

KEY PROJECTS

- **Fuel Monitoring System**
  - Led end-user requirement gathering informally, translating operator needs into a Flutter mobile app with real-time IoT dashboards
  - Designed user-facing analytics views — consumption logs, alerts, and trend reports — based on stakeholder feedback
  - Coordinated between hardware and software teams to ensure seamless data flow from sensors to the user interface
- **RFID Attendance System**
  - Gathered requirements from end users and stakeholders to define features for an automated RFID-based attendance system
  - Designed an accessible UI for real-time monitoring and data export, prioritising ease of use for non-technical users
  - Reduced manual tracking overhead, improving data accuracy and freeing up team time for higher-value tasks
- **Wireless Scanner Conversion**
  - Converted a wired barcode scanner into a wireless device using embedded Bluetooth/Wi-Fi systems
  - Improved device portability and field efficiency, enabling remote and flexible operations
- **WhatsApp Automation Tool**
  - Built a Python + Selenium outreach automation tool for scheduling messages and managing community contact workflows
  - Enabled the team to scale communication efforts without increasing manual effort, improving outreach consistency
- **Dynamic Web Application**
  - Developed a responsive web application using PHP, MySQL, and Bootstrap with secure authentication and dashboards
  - Integrated Oracle APEX for backend data management, reporting, and admin operations

ACHIEVEMENTS & HIGHLIGHTS

★ **First Class Honours** — BSc (Hons) Computing, The British College 2025 — demonstrating analytical rigour and commitment

★ **Published Technical Author** — Managed content, stakeholder coordination & delivery of a full IoT guide (Nepatronix, 2025)

★ **MUN Participant** — Strengthened stakeholder communication, negotiation, and structured public speaking through MUN
